

Eng. Turki Mansour AlTurki

Chief Information Officer · Digital Transformation Executive ·

Cybersecurity & Data Governance Leader

Riyadh, Saudi Arabia

01

EXECUTIVE PROFILE

Two decades of technology leadership
in highly regulated environments

A C-suite technology executive with more than two decades of leadership across higher education, government, and technology ventures in Saudi Arabia. At Saudi Electronic University he holds three concurrent executive mandates — Chief Information Officer, General Manager of Digital Transformation, and General Supervisor of the Data Management Office — directing the university's entire IT, information-security, and data-governance ecosystem in alignment with national digital transformation objectives.

A governance-first leader, he combines deep technical grounding with a proven record of building governance frameworks, directing major infrastructure programs, negotiating large-scale technology contracts, and cultivating partnerships with government and sovereign entities — turning strategic direction into secure, measurable execution.

03 COMPETENCIES

Core executive competencies

Enterprise Cybersecurity Governance & Risk Oversight

Board-level supervision of information-security posture, policy, and institutional risk appetite.

Regulatory Compliance & Audit Leadership

Directing responses to national audit bodies (Diwan); aligning operations with national cybersecurity and data frameworks.

Data Governance & Sovereignty

Founding an enterprise Data Management Office; mandating standards for data quality, classification, and protection.

Digital Transformation Strategy

Translating national-level vision into funded, delivered technology roadmaps.

Business Continuity & Crisis Readiness

Steering enterprise risk management, business continuity, and emergency & crisis management structures.

Infrastructure & Cloud Governance

Overseeing complex data-center estates and governing cloud computing environments.

Strategic Negotiation & Vendor Governance

Managing large-scale technology contracts, bid evaluation, and capital/operating spend efficiency.

Executive Leadership & Change Management

Chairing enterprise governance committees; building digital adoption culture and technical talent pipelines.

04 PROFESSIONAL EXPERIENCE

The professional journey

Most recent first — full details in the downloadable CV.

Saudi Electronic University Riyadh, Saudi Arabia

General Supervisor, Data Management Office

June 2026 — Present

- **Founded the university's Data Management Office** and provides executive administrative and technical oversight, mandating the institution's approved standards for data governance, quality, classification, and protection — establishing data sovereignty and accountability at the enterprise level.

Chief Information Officer (CIO)

February 2025 — Present

- **Enterprise security & governance mandate:** leads the university's entire information technology, IT governance, and information-security ecosystem, ensuring continuous alignment with national digital transformation and regulatory frameworks.
- **Institutional resilience:** directs the integration of advanced IT governance and risk-management frameworks into operational and academic processes, strengthening readiness against cyber and regulatory risk.

General Manager, General Directorate of Digital Transformation

September 2024 — Present

- **Transformation roadmap ownership:** directs the university's digital transformation roadmap end-to-end, converting top-level strategic vision into technology and operational initiatives with tangible institutional impact.
- **Sovereign & strategic partnerships:** builds and steers transformative partnerships with government and sovereign entities engaged in national digital transformation, and with global technology providers.

Islamic University of Madinah Al Madinah, Saudi Arabia

Managing & Technical Director — Deanship of Technology and E-Learning

June 2022 — September 2024

- **End-to-end IT operations command:** directed all technical and administrative operations of the university's central IT function, overseeing infrastructure modernization and enterprise support systems, and ensuring on-schedule delivery of the technology project portfolio.

Managing Director — Deanship of Technology and E-Learning

January 2022 — June 2022

- **Integrated leadership:** unified technical and administrative work teams under a single coordinated operating model, maximizing the Deanship's operational effectiveness.

Computer Engineering Technician — Deanship of Information Technology

February 2020 — January 2022

- **Institutionalized project delivery:** engineered formal project-management practices within the Support and Projects units, raising the consistency and reliability of technology delivery.
- **Exceptional trajectory:** advanced on merit from a technical engineering role to the university's top IT leadership position within two years.

Wakaed Saudi Arabia

IT & Management Consultant — Independent Practice

March 2013 — March 2024

- **Executive advisory:** delivered senior-level training and advisory services in data-center management, cybersecurity, and regulatory technology (RegTech) adoption to public- and private-sector clients across Saudi Arabia.
- **Strategic planning:** formulated technology portfolio and project strategies enabling clients' current operations and future growth.
